

## **Resolution Regarding the Old Westbury College Website**

*Whereas*, the current College website is outdated, inefficient, unreliable and presents an unfavorable image of the College to everyone who seeks information about us on the Internet, and

*Whereas*, every other SUNY college has a better, clearer, more easily updatable website, and

*Whereas*, our own students cannot adequately or efficiently access information about majors, programs, advising, or contact information, and

*Whereas*, we can logically conclude that the continued failure to revise/repair/replace the College website is causing continuous damage to the College's reputation, and

*Whereas*, there has been an initiative to replace our website underway for many months, which has been making steady but slow progress,

*Be it resolved that:*

Additional resources be allocated to bring the new website "live" within a month, and

*be it further resolved that:*

The Office of Public and Media Relations report to each subsequent meeting of the Faculty Senate on the receipt of such resources, and progress towards achievement of a new, modern, functional website for the College, until that goal has been achieved.
