

Resolution on the Office of Services for Students with Disabilities (OSSD)

Whereas the SUNY College at Old Westbury is required to be in compliance with the Americans with Disabilities Act of 1990 by providing access and reasonable accommodation to students;

And Whereas the Faculty have been informed by their representatives that there are conditions that place us out of compliance and raise questions about academic issues with regard to the services received by students with disabilities;

And Whereas, The administration is planning to hire an Assistant Director of the OSSD;

And Whereas, there is an immediate need for screen reading software and other adaptive technologies;

And Whereas, the OSSD is currently inappropriately funded;

And Whereas, that the fundamental service of OSSD is to provide academic support for students;

Therefore, Be It Resolved That the Faculty Senate recommends the following prescriptions:

- 1) No committee be empowered to search for or hire an Assistant Director of OSSD unless the job description includes that majority of tasks and responsibilities of the position be in providing direct services to students;
- 2) That the Administration take the necessary actions to purchase JAWs and other adaptive technologies;
- 3) That the Administration allocate an appropriate and adequate budget to the OSSD which is consistent with other student support services provided by the College.
- 4) And that since the function of OSSD is to provide programs of academic support and tutoring, it should, as do the other academic support services, rest under the administration of the Office of Academic Affairs.
