

Resolution: Policy Regarding Student Participation in Clubs, Committees, and Intercollegiate Athletics

Whereas academic probation is intended as a support measure designed to encourage students to focus on their studies in order that they may satisfy academic standards; and

Whereas involvement in extracurricular college activities, such as clubs, committees, and athletics often helps maintain students' engagement with the institution, and may thus help maintain their commitment to meeting academic standards; and

Whereas barring students who have maintained a cumulative GPA of 2.00 or higher from participating in such extracurricular activities is unnecessarily punitive, and may undermine their connection to the institution;

Be it resolved that a student whose GPA for one semester is below 2.00, but maintains a cumulative GPA of 2.00 or higher may still participate in student clubs, committees, and intercollegiate athletics.
