

Resolution:

The recent anonymous letters being circulated on the past history of Vice President Lawrence Cox are both reprehensible and irresponsible. If any faculty member or members have a legitimate complaint against Dr. Cox, they should take it to the grievance committee of faculty governance. Details of Dr. Cox's biography are only relevant in a search committee's evaluation. It is telling that these accusations for the most part sound trivial and petty. Anonymous accusations don't diminish the reputation of Dr. Cox but do damage the perception of the faculty at Old Westbury and should stop immediately.
