

RESOLUTION

To: SUNY Faculty Senate
From: SUNY Faculty Senate Governance Committee
Date: October 26, 2001
Subject: Resolution on Strategic Planning

Understanding that the basis for long-term strategic planning involves the following principles:

Whereas, Strategic planning for the State University of New York is a matter of public policy that should be grounded in the University's statutory mission and SUNY's obligation to the state legislature and to the people of the state;

And Whereas, The legitimacy and value of any plan and planning process is strengthened by the fullest possible faculty involvement and participation;

And Whereas, Successful strategic planning relies upon a process which is open, inclusive, and representative and draws on the traditions of shared governance;

Therefore Be It Resolved That:

The Executive Committee be charged to request the Chancellor to include five (5) faculty members of the University Faculty by sector as full members of the current strategic planning group. Such members are to be designated by the President of the University Faculty Senate to represent the diversity and expertise of the SUNY faculty.
